

The Mask does NOT stop Covid-19 (Corona Virus) PERIOD!

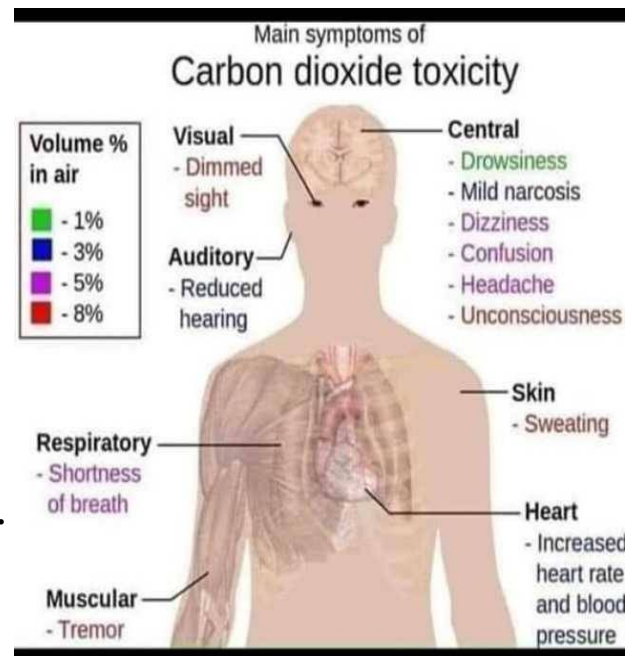

From a Surgeon of 30 years

- 1) Covid Virus Particle size averages 125 nanometers (0.125 microns) The range varies from 0.06 microns to .14 microns. In order to see them you would need an electron microscope.
- 2) The hoarded N 95 mask will filter down to 0.3 microns. It can filter few if any of the virons (virus particles).
- 3) All other surgival masks, home made masks and bandannas do the following
Allow free passage both ways, in and out, of Covid-19 virns
They become warm, damp, or moist reservoir of Covid-19 particles in asymptomatic carriers (estimated to be 85% of all people tested)
- 4) Surgeons are taught to touch nothing outside the surgical field. Lay people constantly touch, re-arrange, and manipulate their masks. This inoculates thousands of virus particles onto their bare or even worse, gloved hands.

In Short the mask, any mask is nothing more than a Linus the comic book character security blanket giving a false sense of security.

The mask, any mask does more harm than good. They not only can NOT stop the Corona virus, but they can also cause Carbon dioxide toxicity

Bottom line TAKE OFF THE MAST

The purpose of the mask is not to stop the virus its to display government power over us. Its an attempt to see how much they can get away with. The mask is no different a symbol of tyranny than the swastika or the hammer and cycle.
